

Hi {member name},

We recently organised a Mental Health and Illness talk with ICAS, an Oral Health talk with Dr Ramjee and a Vitality Presentation on the importance of preventative screening. For those who attended, did you find these beneficial? We'd love you to share your experiences with us, via email, website live chat or our Workplace intranet. Your feedback will guide us in organising future events for you.

We're thrilled that you're using our services, whether you've only used the service once this year or you've made GSK on Tap part of your daily routine. From the occasional user to the super user – we want to hear from you!

What have you used the service for? How was the experience? What keeps you coming back? Please share your stories via email using [info@gskontap.co.za](mailto:info@gskontap.co.za), conveniently using the live chat facility on [www.gskontap.co.za](http://www.gskontap.co.za) or through our Workplace intranet portal. You can write to us or, even better, send us a video where you tell us about your GSK on Tap experience.

We can't wait to hear and see what you have to say

The GSK on Tap Team
